

The New Design: Shelves and Bookcases

Most areas of the house need storage areas for certain valued objects. Interior design plays a crucial role in creating suitable spaces to work and to keep at hand highly appraised articles. A number of factors must be considered, such as the need of specific tasks to be carried out, as well as lighting, personality of the inhabitants, current trends in shapes, colors and textures, etc. The aim of The New Design: Shelves and Bookcases is to provide the reader with practical ideas for storing things they invariably possess, including day to day utensils, books, ornaments, artwork, family mementos and anything that needs to be put away, displayed in the most stylish and comfortable manner possible.
