

## Edibles: Fun Food to Color

Who doesn't love food? But the food we crave may not be the best for us. Here's a way you can enjoy the look of your favorite foods without the guilt. Your hands will be so busy coloring you won't have the time to indulge. My hope is that you will have as much fun coloring these fun pics of food as I did creating them. The 40 pages of edibles contains everything from cake to sushi. They are printed on one side only. The variety of art will set your coloring imagination free. So choose your colors and method and set your imagination free. My personal favorite is artist grade colored pencils. But you can use magic markers and crayons. Wet media, like watercolors, acrylic paints are not recommended.
