

Planning, Design, and Construction of Health Care Facilities, Second Edition

Planning, Design, and Construction of Health Care Facilities, Second Edition, an updated version of a Joint Commission Resources best seller, is a comprehensive guide for health care organizations around the world that are looking to build new facilities or update their current structures in compliance with Joint Commission, Joint Commission International, and other recognized standards of health care design excellence. A wealth of strategies, tools, and real-world experiences of organizations around the globe supply the reader with the building blocks you need for sustained success with your new facility or existing structure. Planning, Design, and Construction of Health Care Facilities, Second Edition assesses challenges, compliance issues, and the need for a holistic approach to the design and function of health care facilities. In this new edition, you receive access to valuable online resources that support and enhance the printed material, including customizable tools you can use immediately in your organization.
