

The Musical Faculty: Its Origins and Processes (Classic Reprint)

Excerpt from The Musical Faculty: Its Origins and Processes This book deals with the mechanism of the musical sense more closely than was possible or expedient in its predecessor, The Threshold of Music. Its aim is psychological rather than musical, and it records in outline the mental processes concerned with the creation and production of Music. It has been my endeavour to avoid repetition, and in returning to the question of Heredity, I have been influenced by the fact that since The Threshold was published, some attention has been given to Music by those who are applying Mendel's Law to Man. What follows on this subject should be read along with the chapter on Heredity and Environment in my former book. The text is not burdened with references to works on Psychology, for the reason that Music, when discussed at all, even in the larger treatises, has been considered almost entirely from the outside. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
