

The Future of Musicians: A Plea for Organization (Classic Reprint)

Art, the History of Music and the Biographies of Musicians, continually occupy writers on Music, and quite a library on these subjects is in existence. One subject however has, so far, attracted but little attention from writers, although bound up with the life of Musical Culture, viz.: Music as a Profession and the economic position of Musicians in the general struggle for subsistence. It is difficult to understand why this essential basis for the well-being of Music as an Art has been neglected, why Music has always been treated as something external to life, and its material interests, as having no claim to consideration. A discussion of this subject at the present stage of the development of Music is the more necessary in view of the circumstances bearing upon the different sections of the Profession.
