

365 Passages from Joseph Addison: Observations on Human Nature & Life

A collection of shrewd observations from one of history's most admired writers. Known for his command of the English language, Joseph Addison never fails to set the brain considering how our world works and how human nature acts in particular situations. See through the eyes of a great thinker as you read these beautiful and expression passages of careful thought. If you wish success in life, make perseverance your bosom friend, experience your wise counsellor, caution your elder brother, and hope your guardian genius. Books are the legacies that a great genius leaves to mankind, which are delivered down from generation to generation, as presents to the posterity of those who are yet unborn. All other arts of perpetuating our ideas continue but a short time. Statues can last but a few thousands of years, edifices fewer, and colours still fewer than edifices. Michael Angelo, Fontana, and Raphael will hereafter be what Phidias, Vitruvius, and Apelles are at present, the names of great statuaries, architects, and painters whose works are lost. The several arts are expressed in mouldering materials. Nature sinks under them, and is not able to support the ideas which are impressed upon it.
