

Raphaels Astronomical Ephemeris of the Planets Places for 1998: A Complete Aspectarian

This is a reference source for professional and student astrologers alike. The book has been published annually since 1821. It gives the longitudes of all the planets for each day and their latitudes and declinations for every other day, and includes tables of houses for London, Liverpool and New York. The book also contains complete lunar and planetary aspectarians together with all the necessary data for casting horoscopes for all places in the world, both north and south of the Equator.
