

Every Ripple on the Water: Unlocking Your Creative Inner Self

What makes people creative? How does a culture create timeless art? Is there an underlying creative energy that transcends the daily, ordinary way most people live, and can this power be tapped to transform a persons life? These are the fundamental questions that Every Ripple on the Water addresses. Although the modern world seems dominated by rational thought, empirical results, and monetary gain, the way of the artist suggests that a deeper, more fulfilling mode of consciousness may exist. After all, how many people expect his or her lifes work to be studied, admired, or even remembered 100 years from now? And yet, isnt this exactly what happens to the true artist? Designed to inspire the reader to become more creative, this first of three volumes uses concrete artistic examples to describe how the creative faculty functions. The eternal message of Michelangelos masterpiece, the Pieta, guides the reader on a historic journey that leads to the summit of the Neoplatonic culture that produced Florences Golden Age, and highlights how women play a pivotal role in activating the creative imagination. The startlingly simple techniques that ensue enable everyone to add purpose and direction to their lives by unlocking the creative inner self.
