

Innovation Ecosystems (ISTE)

With innovation fast becoming omnipresent and part of strategic matters, there is a growing need to understand how to jumpstart the innovation process. This book introduces the concept of e-co-innovation, which fosters the successful transition from idea to reality and ultimate value. It provides a global and system overview of the subject and presents various aspects of innovation from different angles and perspectives, leading to an understanding of all ecosystem components, their metamorphoses, cross-influences and possible impacts on the balanced development of people, businesses, regions and countries.
