

## Saving Private Healthcare

The U.S. healthcare system will financially collapse in three to five years if we stay on our current path. Millions will lose their health insurance, thousands of doctors will leave medicine, wait times for medical care will dramatically increase, and quality of care will plummet. Saving Private Healthcare calls out the many problems in healthcare, including the new Obamacare law, then offers a pure, open-market, commonsense, and complete re-design of all sectors of our healthcare system with a sweeping new approach called The Saving Private Healthcare Initiative. The Initiative is both a powerful and easy-to-understand plan combined with a large organization of both private citizens and healthcare experts who will bring down healthcare costs by two-thirds or \$2 trillion per year by 2022. We must have a complete solution to our healthcare crisis, a well-constructed implementation plan, as well as an open-market, energized movement to actually make it happen. Welcome to Saving Private Healthcare. If there was ever a book for today, this is it. As well-intentioned leaders wrestle self-interest groups over health reform, this book offers commonsense direction and comprehensive guidelines on how we as a nation can dramatically lower healthcare costs without reducing everyone's access to high quality healthcare.

Ilene Little, CEO, Traveling4Health.com  
This is the kind of out-of-the-box, innovative thinking that we need to restore affordability to our healthcare system using open-market, non-governmental solutions.

Dr. Alieta Eck, president,  
Association of American Physicians and Surgeons
