

A Simple Explanation For Everything

From QUANTUM ENTANGLEMENT to REINCARNATION From THE ORIGIN OF THE UNIVERSE to THE HUMAN SOUL HDI theory Higher Dimensional Interactions says that every physical object in our universe is the result of higher dimensional objects interacting with our three dimensional space. Higher Dimensional Interaction sounds complicated (and kind of new-agey), but its really quite simple and down to earth. Anyone with a sixth grade education and a little imagination can understand HDI theory. If you can push the tip of a pencil through a sheet of paper, then you can understand everything from quantum entanglement to the human soul. This book will reveal a simple and elegant solution to many of todays greatest scientific mysteries: the origin of the Universe, quantum entanglement, gravity, dark matter, and animal instincts. Even many of the central mysteries of the great spiritual traditions can be explained with HDI theory: the human soul, reincarnation and Spirit. HDI theory is a true theory of everything, unifying with one core principle everything from the very large (the Big Bang), to the very small (quantum entanglement), to the very mystical (the human Soul).
