

In Art: Maps (Enjoying Great Art)

Maps and globes have been a big part of our everyday life, at least in the past. But do we think of them when we think of great art? Here is a picture book for adults and students of all ages. A picture book of maps and globes in art! In some of the paintings the globes or maps are props, in some they are wall decorations. In some they are only small parts of the painting, and in some they are more the focus of the painting. Note to parents: All of the paintings selected for the books in this series are child-friendly - but we aren't necessarily recommending all of the other paintings by these same artists! If you and your children want to go exploring after this - please exercise caution.
