

# Circle of Sound Voice Education: A Contemplative Approach to Singing Through Meditation, Movement and Vocalization

(Boosey & Hawkes Scores/Books). Circle of Sound Voice Education is a contemplative approach to singing that blends ancient Eastern breathing meditation and martial art movement practices with Western bel canto vocalization exercises as an inspiring and healthful way of enriching traditional approaches to studio, classroom, and rehearsal pedagogy. This revolutionary approach connects the power of singing to the wholeness of body, mind, and spirit all in one great textbook.
