

ASSAR Architects (Master Architect (Unnumbered))

ASSAR group , with its 20-year history, has had a major impact on the cityscape of Brussels. Projects to date include offices, housing, industrial buildings, research laboratories, retail, new buildings and renovation, urban planning, interior design and programming. The firms recognisable style is the result of its desire to design a contemporary architecture appropriate to its context. This monograph features some of ASSARs major projects, including headquarters buildings for well-known companies such as AXA Belgium, ING Bank, LOreal, Robert Bosch and UCB, and several research laboratories including a substantial facility for GlaxoSmithKline Biologicals. Other projects of note include The Royal Military Academy in Brussels, the countrys first new military academy in more than a century.
