

News Recent Architecture by Peripheriques

Peripheriques frequent participation in the international ArchiLab exhibition in Orleans and their contribution to the Architecture Biennale 2002 in Venice are sure signs of the national and international recognition which they are receiving. In 2000, Birkhauser first published an overview of their architectural work entitled M.I.N.N.E.S.O.T.A. now out of print, and the time has come to document their latest works. This new volume describes Peripheriques most recent buildings and projects. Amongst the realised buildings are the Maisons Icone and MR, the transformation of the Place Furstenberg in Paris, the Cafe Charbon in Paris, and no doubt the high point is the Cabinet dart graphique at the Centre Georges Pompidou. Also included are a number of fascinating new projects such as the Small Towers in Tsumari, Japan, the concept for the Habitat shops in Paris and the urban plans for the new Parisian Cite Universitaire.
