

New Leadership DNA. Developing enlightened leaders (New Success DNA. Book 3)

Leadership is all about influencing people to move in a specific direction. As we all have influence, we all have a leadership role to fulfil. Currently a major genetic migration within the human species is taking place. This is giving rise to a new level of consciousness and a generation who are highly evolved and who can think for themselves. This demands new leaders with a new leadership approach and even a New Leadership DNA. At the same time, research provides proof that we have the true essence of success and quality leadership already encoded into our DNA. We have a guide-spot, an inner GPS, where we can connect to higher wisdoms and gain direct access to universal guidance and direction. All we need is the correct understanding, skills and tools to find the way and to assist others. A power-shift is also taking place as a shift in consciousness. Currently, leadership is moving from ego-centred values of power-over-people; to soul-centred values of releasing power-within-people. Power positions are changing from power-in-numbers to the number-of-powers in each individual. Everyone has a prominent role to play to secure a safe transition into the future. Power shifts and changing positions in leadership are placing increasing demands on the status quo, while challenging fixed mind-sets. At the same time, individual awareness is growing that there is something better, and that we all deserve a quality life. This new consciousness is causing the old to disintegrate at a rapid pace, and a new wave of inspired innovative leaders, with New Success DNA and New Leadership DNA, is emerging. The aim of this book is to provide guidelines, skills and tools for everyone who is committed to successful living while identifying and developing new enlightened leaders to show the way.
