

The Jacobean Grand Tour: Early Stuart Travellers in Europe

Although the eighteenth century is traditionally seen as the age of the Grand Tour, it was in fact the continental travel of Jacobean noblemen which really constituted the beginning of the Tour as an institutionalized phenomenon. James Is peace treaty with Spain in 1604 rendered travel to Catholic Europe both safer and more respectable than it had been under the Tudors and opened up the continent to a new generation of aristocratic explorers, enquirers and adventurers. This book examines the political and cultural significance of the encounters that resulted, focusing in particular on two of Englands greatest, and newly united, families: the Cecils and the Howards. It also considers the ways in which Protestants and Catholics experienced the aesthetic and intellectual stimulus of European travel and how the cultural experiences of the travelers formed the essential ingredients in what became the Grand Tour.
