

## The Sha Mans shaman Ways

Buddha, Christ and me all guide you back to the beginning of the story and that is loll, you. They all say that the path lies within through good acts, meditation and exercise. Along the way you encounter both the beautiful super conscious sights, various psychic abilities, your own energy flows and unfortunately, internal demons. In deep meditation wisdom, mantras and self-affirmations are provided by spirit along with a stronger and stronger Kundalini flow and a more and more relaxed mind and body. This book is I believe the best attempt currently to describe in simple understandable English all that one can encounter both internally and externally in the world with scriptures and religion or without. No human priestly intervention is required although a group to practice the psychic abilities is more than useful. Go with God for he definitely goes both in you and with you.
